

Strengthening efforts in addressing water-related disaster risk reduction

Convened by the Embassy of the Republic Tajikistan in Hungary

Side Event - Budapest Water Summit 2016

30 November 2016, 16:30-17:30 – Tisza Gallery (Building D)

The side event entitled "Strengthening efforts in addressing water-related disaster risk reduction" will be organized by Tajikistan in cooperation with Japan, Thailand, Peru, UNISDR, UN-Water and WMO. The event will raise awareness and strengthen political commitment to reducing risks from water-related disaster. It will foster a discussion on key factors of success to address water-related disasters and the role and contribution of different stakeholders. It will explore the needed cooperation and synergies at different levels, including within the UN system.

The event will contribute to the Budapest Water Summit by involving participants in deliberations on the implementation on new global water agenda, the need to step up efforts and catalyse actions by all relevant players to secure a world safe from water-related disasters.
